PROFILE

I'm a self-taught full-stack developer passionate about understanding client needs and delivering clean, scalable, and well-tested software.

With a growth mindset, I'm always eager to learn and adapt. I'm excited to apply my skills and continue growing as I take the next step in my career.

SKILLS

Programming Languages:	JavaScript/TypeScript, HTML, CSS
Frameworks and Libraries:	Django (Django-REST), React/Redux, Node.js (Express), React Bootstrap, Tailwind CSS, NextJS, git, npm
Database Administration:	PostgreSQL, MongoDB
Cloud Platforms:	Amazon Web Services (S3, EC2, Lambda)
Soft Skills and Traits:	Critical thinking, fast learning, time management, excellent written and spoken English and adaptability.

PORTFOLIO

You can find the projects listed below on my personal website at www.sezdev.com. Please refer to the *readme* document of each repository for additional information on any given project.

SHOP SMART - PRPDOCUT COMPARISON

Description:	This is a React-based application that fetches product data from multiple local csv files and displays the products in a searchable and filterable list. The app provides a clean and responsive interface, built using React Bootstrap and Bootstrap CSS to help users easily browse large set of products.

GitHub Repo:	https://github.com/sezginbozdemir/product-comparison

INVENTORY SOLUTIONS

Description:	This is a full-stack inventory management application built with the following technologies: React (with Typescipt), Mantine UI, Tailwind CSS, Redux, Node.js, Express, MongoDB, JWT
Live Demo:	https://inventory.sezdev.com/
GitHub Repo:	https://github.com/sezginbozdemir/inventory-solutions

EXPERIENCE

FRONTEND DEVELOPER , EMRENGROS.RO — 2018-2021

My Role:	Worked as a Frontend Developer, maintaining and enhancing the company's e-commerce website. Built custom features to improve user experience and handled integrations with Google Ads, Meta Ads, and Google Tag Manager to support marketing efforts.
